

Optimize your flow and reassure your customs operations

In a customs modernization context oriented «simplification» and «security» (increase in the number of physical and documentary controls, growth of the merchandises' traceability...), achieve information turns out to be difficult to a large number of companies

Taking into account all these confines and adopt the best customs strategy comes close to a challenge.

You wish to think ahead about risks linked to your international exchanges in the customs and fiscal fields and optimize your supply chain but:

- ⊙ You run out of time and means to do so?
- ⊙ You do not make the most of optimizing opportunities offered by the regulation: economic and suspensive regimes, preferential agreement, exemption and customs certification...?

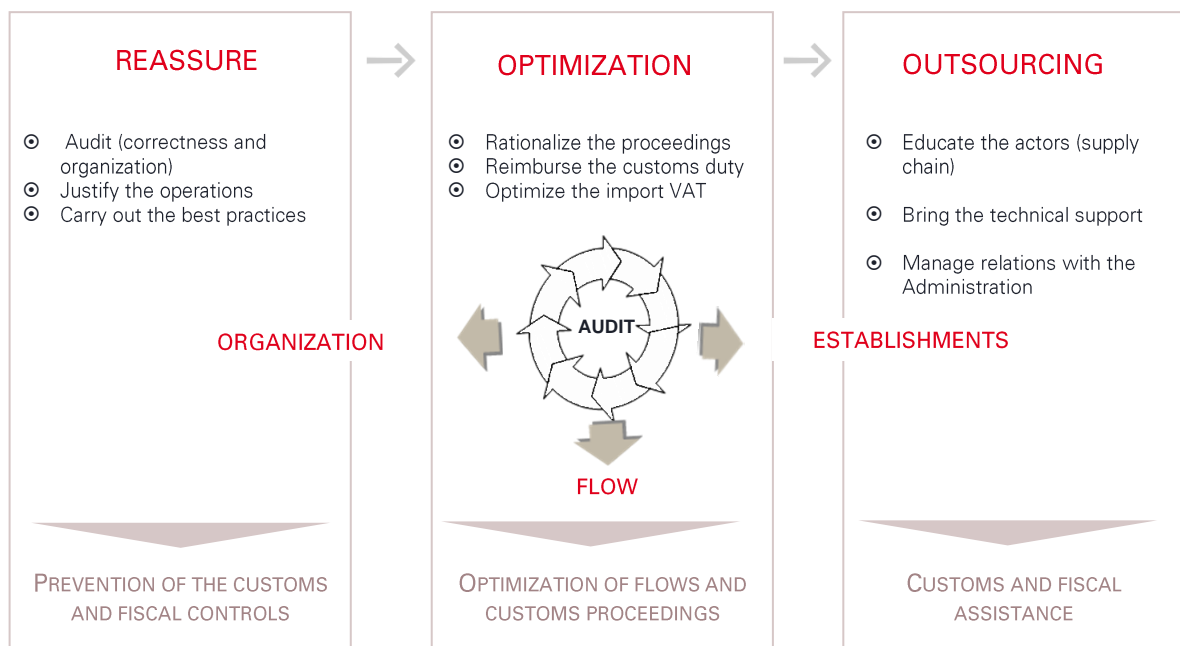

Entrust a well known partner of the customs and fiscal administration with your entire problematic and make real savings.

The Lowendalmasai Solution

As part of our partnership, your company is on a global optimization and reassure offer. The dedicate teams bring you a concrete answer to your ground difficulties and operate between:

- the internal and external links of the supply chain
- you and the customs administration

This operational approach, which engagement is provided overall the mission, takes into account the specificities of your line of business and enables to activate the following levers:

Cut the cost of customs clearance and optimize the nominal tariff and the import VAT.
